

WELCOME BACK PACKS

Lysol partnered with the CDC Foundation to develop Welcome Back Packs to help support safe in-person learning. **Welcome Back Packs** include engaging resources and educational materials to help promote healthy habits during the unprecedented school year such as:

Lesson plans, co-created with educators, to help students learn healthy habits such as handwashing, social distancing, wearing a mask, cough and sneeze etiquette and curbing germ spread.

Informational posters to place around the schools where healthy habit reminders are needed.

Stickers and decals that take the guesswork out of social distancing such as “here” stickers to place around the classroom or germ hotspot stickers to call out where germs are usually found.

Activities and resources that go beyond lesson plans to provide schools with engaging ways that make healthy habits fun.

Welcome Back Packs are available to download and print for free at [Lysol.com/HERE](https://www.lysol.com/HERE)
